
Study Alpha Source Review Guideline

SC-ALPHA-GOV-26 | Snapshot 2026-09-02 | Synthetic cohort: 48

Purpose. A source-review guide for the Study Alpha 2026 synthetic evidence pack.

All examples are synthetic. The 2.5 mg threshold is protocol governance, not medical advice.

Source eligibility

Accept only clearly labeled synthetic inputs tied to the 2026-09-02 snapshot. Exclude real-world records, test results, and identifiers.

Review lenses

Traceability: can the source be linked to a synthetic artifact? Consistency: does it state cohort 48 where relevant?

Governance: does it preserve the 2.5 mg boundary statement?

Disposition

Mark accepted, revise, or exception review. Record the reason without copying sensitive content.
