

Validation Summary

Study Alpha 2026 | synthetic training packet | 2026-09-02

Validation object	Synthetic submission packet
Outcome	Training-format checks completed
Important limitation	No clinical, regulatory, or operational validation is asserted

Observed checks

Check	Result	Observation
Anchor consistency	Pass	Study Alpha 2026, snapshot 2026-09-02, cohort 48, and review threshold 2.5 mg align across packet items.
Endpoint transcription	Pass	Synthetic Day-28 values: -4.8 versus -2.1; adjusted difference -2.7 (95% CI -4.1 to -1.3).
Safety transcription	Pass	Seven non-serious synthetic events across six synthetic participants; zero synthetic serious events.
Synthetic-use labeling	Pass	Principal pages state training-only and fictional/synthetic limitations.
Scan treatment	Pass	Receipt and signature-page simulations are raster, image-only PDFs and avoid real signatures.

Disposition

Suitable only for internal synthetic-document training. The validation summary does not certify any product, dataset, filing, process, or outcome.
