

Study Alpha Synthetic Safety Summary

Sakura Clinical Study Alpha 2026 | Data cut: 2026-09-02 | Cohort: 48 | Fully synthetic operational record

Snapshot

Seven non-serious adverse events were recorded across six synthetic participants. No serious adverse events were recorded. All identifiers, observations, and outcomes in this summary are synthetic.

Measure	Value
Cohort	48
Total AEs	7
Non-serious AEs	7
SAEs	0
Participants with AE	6
Protocol review threshold	2.5 mg (not medical advice)

Case reconciliation

Case ID	Synthetic participant	Event	Severity	Outcome
AE-ALPHA-001	SYN-ALPHA-01	Headache	Mild	Resolved
AE-ALPHA-002	SYN-ALPHA-02	Nausea	Mild	Resolved
AE-ALPHA-003	SYN-ALPHA-03	Injection-site discomfort	Mild	Resolved
AE-ALPHA-004	SYN-ALPHA-03	Fatigue	Mild	Resolved
AE-ALPHA-005	SYN-ALPHA-04	Dizziness	Moderate	Resolved
AE-ALPHA-006	SYN-ALPHA-05	Rash	Mild	Resolving
AE-ALPHA-007	SYN-ALPHA-06	Diarrhea	Mild	Resolved

Review note

This is a synthetic quality-review snapshot, not a clinical guidance document. The 2.5 mg value is a protocol review threshold and must not be interpreted as medical advice.
