

Deliverable readiness checklist

A practical release gate for client-facing analyses, decision packs and working materials.

AUDIENCE	Engagement managers, workstream leads and quality reviewers
PURPOSE	Ensure every deliverable is accurate, decision-ready, traceable and safe to release.
VERSION	1.0 As of 13 Jul 2026
OWNER	Avery Calder Engagement Excellence

Release sequence

Use this sequence in order: define the decision; reconcile source facts; test the storyline; complete quality gates; obtain accountable approval; then publish through the designated client channel.

Gate checklist

- Decision and audience are explicit in the title and opening page.
- Every conclusion is supported by a named analysis, source or clearly labeled synthetic example.
- Numbers reconcile across narrative, exhibits and appendix.
- Actions name an owner, timing and decision required.
- Sensitive material has been classified and shared only with the permitted audience.

Control record: minimum evidence for a review

Control point	Evidence to retain	Decision rule
Scope	Decision statement and named audience	Proceed only when scope is bounded.
Evidence	Source/assumption log and review notes	Separate verified facts from estimates.
Action	Owner, timing and next review date	Assign one accountable owner.

Application notes

Worked example: Client Alpha

Synthetic example data. Client Alpha Phase 1 Finance has an approved diagnostic budget of **JPY 42.8M**. The steering-pack recommendation must distinguish approved budget from forecast spend, state the decision requested, and show the assumption log.

Reviewer decision criteria

Approve when the conclusion is evidenced, the client can act without a separate explanation, and residual uncertainty is named. Return for revision when a value lacks provenance, a chart changes scale without disclosure, or an implied decision has no owner.

Decision worksheet

Control point	Evidence to retain	Decision rule
Scope	Decision statement and named audience	Proceed only when scope is bounded.
Evidence	Source/assumption log and review notes	Separate verified facts from estimates.
Action	Owner, timing and next review date	Assign one accountable owner.

Practice note. Use concise records that make the next decision easier. This guide is an internal operating reference; it is not a substitute for engagement-specific governance.

Execution and review

Final handoff

Confirm filename, version date, client audience, access location and meeting context. Archive source extracts and review comments with the final PDF or deck. Do not treat a chat acknowledgement as formal client approval.

Practical checklist

- Confirm the purpose and audience before working from the guide.
- Maintain clear distinction between verified facts, assumptions and synthetic examples.
- Record accountable owner, next step and decision date.
- Invite an independent reviewer when conclusions or access risks are material.
- Update the engagement record after the decision is made.

Sign-off prompts

Control point	Evidence to retain	Decision rule
Scope	Decision statement and named audience	Proceed only when scope is bounded.
Evidence	Source/assumption log and review notes	Separate verified facts from estimates.
Action	Owner, timing and next review date	Assign one accountable owner.
