

Client Alpha finance export summary

Phase 1 | Summit Vale Advisory | Prepared 13 Jul 2026

Purpose

Scope and decision use

This cover note accompanies the Client Alpha Phase 1 finance export. It supports weekly portfolio review and is not a client invoice, a purchase authorization, or a replacement for the finance system of record.

Executive readout

Phase 1 budget envelope: ¥42.8M.

Use the export to isolate approved commitments, current forecast, and items needing a finance owner decision. Values are recorded in Japanese yen and should be read with their export date and status.

Key fields

Metric	Export field	Treatment	Reviewer
Approved Phase 1 envelope	budget_envelope_jpy	42,800,000 JPY	Keiko Mori
Committed spend	committed_jpy	Orders and signed SOWs only	Daisuke Ito
Forecast at completion	forecast_jpy	Latest owner forecast	Keiko Mori
Variance to envelope	variance_jpy	Forecast less 42,800,000 JPY	Finance PMO
Funding stage	funding_status	Confirmed / pending / exception	Finance PMO

Boundaries

The package contains synthetic planning records for portfolio coordination. It excludes payroll, bank details, vendor account information, and unapproved scenario assumptions.

Review and handoff

Recommended review sequence

Step	Control	Evidence retained
1. Extract	Use the 13 Jul 2026 client-alpha download	Register row and source timestamp
2. Reconcile	Compare commitment IDs to finance workbench	Variance note for each mismatch
3. Classify	Assign run, change, or contingency treatment	Owner and review date
4. Release	Share only the approved export package	Version tag and recipients

Exception handling

If a line is missing an owner, status, or as-of date, retain it as an open request rather than inferring a value. Note the requested correction in the Client Alpha open-requests export and route it to the finance PMO.

Portfolio link

Client Alpha is one workstream in the Summit Vale Advisory portfolio. Cross-client comparison should use export dates, status definitions, and owner accountability; do not merge detailed financial records across clients.
