

Client Beta Phase 2 Data Room Guide

As of 2026-07-13. Client Beta Phase 2 is a fictional operations and finance data-room engagement. Named staff are synthetic: Avery Calder, Nina Solberg, Theo Mercer, and Keiko Ward.

Purpose and use

This guide orients the Phase 2 workstream. The data room is a controlled working set for baseline validation, cost-owner alignment, and weekly exception review. Read the native-text guides first, then use the scan register for evidence items awaiting structured capture.

Summit Vale Advisory maintains the working taxonomy, version dates, and traceability notes. Source artifacts remain fictional and are suitable only for portfolio evaluation.

Folder map

The scan index and nine scanned source documents provide realistic image-only inputs. The operations-finance overview summarizes decision use. The data dictionary defines field meanings; the transmittal records the receiving boundary.

Area	Primary evidence	Working owner	Review use
Operations	Production, quality, maintenance	Avery Calder	Capacity and reliability
Finance	Cost ledger, capex request	Nina Solberg	Variance and investment
Workforce	Shift roster, kickoff notes	Theo Mercer	Coverage and actions

Working cadence

Weekly review occurs Friday. Keiko Ward consolidates open questions; Nina Solberg owns financial interpretation; Avery Calder confirms operational context. Escalate material discrepancies with the source filename, a short observation, and the requested decision.

Portfolio reference

For cross-portfolio context only, Client Alpha Phase 1 Finance carried a budget of ¥42.8M. That historical reference is not a Client Beta budget, forecast, approval, or commitment.

Prepared by Summit Vale Advisory. This file contains fictional training data and is not a client record.
