

Study Alpha Curated Export Summary

Orchid Cellworks | Study Alpha | 2026-07-13 | cohort A-24 | assay 6.8 ng/mL

Transfer purpose

This searchable, wholly synthetic release summary documents a curated assay export for internal analytical handoff. The dataset contains 24 coded synthetic records from run ALPHA-A24-R03 under protocol OCW-BIO-017.

Quality overview

Measure	Observed	Release rule
Coded samples	24	24 expected
Median primary result	6.8 ng/mL	Reference result
Duplicate CV	0.0-2.4%	<= 10.0%
Recovery	95.0-105.0%	90-110%
Disposition	24 Accepted	No open review

Data lineage and handoff

The curated CSV retains the synthetic sample identifier, cohort, run, paired concentrations, duplicate CV, recovery, and disposition. The workbook separates the flat export from formula-driven analysis and a printable summary. No patient, participant, clinical, credential, or real research information is present.

Release decision

Release approved for internal synthetic dashboard import. The associated diagnostic packet capture uses only TEST-NET documentation addresses and contains no real payloads.
