

Instrument Release Note

Release window: 2026-07-13 | Windows laboratory workstation | en-US

Purpose

Documented readiness review for the synthetic export associated with Study Alpha.

Run disposition

ALPHA-A24-R03 was released after a stable rerun review. The observed assay concentration reference is 6.8 ng/mL for cohort A-24.

Operator guidance

Use the attached CSV as a read-only incoming export. Preserve the run identifier when filing the result.

Quality statement

Instrument status is suitable for the recorded workflow; this release note is not a clinical report.

Checkpoint	Observation	Disposition
Detector baseline	Stable across preflight interval	Accepted
Run identity	ALPHA-A24-R03 / cohort A-24	Matched
Assay reference	6.8 ng/mL	Recorded
Export package	CSV rerun plus plate preview	Released

Distribution note

This file is a fully synthetic operational record prepared for local training and visualization. It contains no clinical material, personal data, credentials, or external supplier information.
