

Study Beta B-16 observation summary

Orchid Cellworks · wholly synthetic method-training record · 2026-07-13

Study Beta synthetic run BETA-B16-R02 compares baseline and treated conditions across 16 simulated samples.

Observation	Value	Context
Synthetic sample count	16	Training-only B-16 record set
Baseline normalized signal	1.00	Reference condition
Treated normalized signal	1.18	+0.18 relative signal
Run identifier	BETA-B16-R02	Independent synthetic run
Interpretation	Directional comparison	Not interchangeable with Alpha assay concentration

All listed observations and values are synthetic; no external specimens, participants, or patient data were used.
