

# Study Alpha Dose-response Methods

Orchid Cellworks | Study Alpha | 2026-07-13 | cohort A-24 | assay 6.8 ng/mL

## Model specification

A four-parameter logistic illustration provides a stable synthetic response relationship across the specified dose range.

## Decision rule

Residual patterns are reviewed alongside the target assay 6.8 ng/mL and duplicate CV threshold.

| Metric                | Result    | Decision      |
|-----------------------|-----------|---------------|
| Synthetic cohort size | 24        | Retained      |
| Median assay          | 6.8 ng/mL | Within target |
| Duplicate CV          | 4.7%      | Pass          |
| Recovery              | 98.6%     | Pass          |
