

Executive finding

The synthetic BETA-B16-R02 export contains 16 synthetic samples and 32 replicate readings. No PHI, PII, credentials, or real laboratory data are present.

Checks performed

Delimited files are UTF-8, headers are consistent, rows are rectangular, and identifier values follow the OCW-B16 synthetic scheme. Replicate pairs differ by 0.020 AU.

Control review

Blank 0.021 AU is within 0.00-0.05. Low control 0.492 AU is within 0.45-0.55. High control 1.246 AU is within 1.15-1.35.

Traceability

Orchid Cellworks, 2026-07-13. The documented alpha calibration reference is Study Alpha cohort A-24, assay 6.8 ng/mL. It is explicitly non-source context.

Disposition

Synthetic export suitable for downstream demonstration analysis. QC status complete.
