

Working note bundle

Desk synthesis • 2026-07-13 • prepared for the Linden Archive Project

Question in view

How does the recurring linden image connect municipal memory to the portable evidence held in Box 14? This desk bundle treats the folio as a rhetorical hinge rather than a final answer.

Source handling

Folio 184 is cited as LA-042 throughout the working set. The phrase “folio 184” is a locator in a fictional internal sequence; it is not a claim about a real archive.

Next pass

Compare the lexical field of shade, circle, and keeping across the synthetic correspondence sequence, then record counterexamples before drafting prose.

Reference	Reading	Working consequence
LA-042	Box 14, folio 184	Keep as the central comparison point.
LA-031	Box 14, folio 181	Test whether the spatial metaphor begins earlier.
LA-057	Box 14, folio 188	Use as a cautious contrast, not confirmation.

All names, collections, dates, and analytical statements in this file are wholly synthetic.
