

French Palaeography Reference

Synthetic reading aid for multilingual correspondence

Scope

This wholly synthetic reference supports the Linden Correspondence Series at the fictional Haldenmere Civic Repository. It records a working method rather than an external authority. The project snapshot is 2026-07-13; the example reference is Box 14, folio 184, citation LA-042.

Observation protocol

Describe letterforms, ink variation, line breaks, and cancellations separately from interpretation. Preserve paragraph identifiers P01, P02, and onward when recording a parallel reading.

Terminology

The term tilleul is tracked beside linden, Linde, and the Japanese term for linden. This guide offers fictional examples only and does not reproduce historical handwriting.

Observation	Working notation
Ambiguous word	[word?]
Unreadable span	[illegible: n words]
Editorial supply	[supplied: text]
Deletion	text
