

Translation Standards Guide

Synthetic alignment and review notes

Working principle

This wholly synthetic reference supports the Linden Correspondence Series at the fictional Haldenmere Civic Repository. It records a working method rather than an external authority. The project snapshot is 2026-07-13; the example reference is Box 14, folio 184, citation LA-042.

Alignment

Keep original and translation adjacent, retain paragraph identifiers, and note a choice when imagery changes register. The linden image is treated as an editorial meeting device, not a stable national symbol.

Review trail

A reviewer records source ID, language pair, decision, and confidence without identifying any real translator or contributor.

Pair	Check
English / French	linden / tilleul
English / German	linden / Linde
English / Japanese	linden / Japanese linden term
Key item	LA-SRC-B14-F184; citation LA-042
