

Linden Archive Project

Synthetic Download Provenance Report

Purpose

This report records the fictional download batch prepared for the Linden Correspondence Series at the fictional Haldenmere Civic Repository. It is a synthetic research-training record, not an archival source.

Field	Recorded value
Batch reference	Box 14 / folio 184 / citation LA-042
Reference date	2026-07-13
Related containers	Box 09, Box 18, Box 21
Transfer type	Synthetic scan-intake set
Disposition	Accepted after visual and signature checks

Validation checklist

Each delivered file was checked for expected filename, PDF page count, PNG signature, visual readability, and a unique SHA-256 digest. The five intake PDFs contain an image page only; the provenance report retains a searchable text layer.

Synthetic-content notice

All names, collection descriptions, identifiers, and dates in this report are invented for the Linden Archive Project corpus. No real records, personal data, or restricted archival material were used.
