

Box 14 Chronology Discrepancy Note

A synthetic control note for editorial sequencing

Focal collection	Review date	Classification
Box 14 / Linden Correspondence Series	2026-07-13	wholly synthetic

OBSERVED TENSION

The fictional packet places a weather reference before an apparent response. This may reflect copying order, delayed annotation, or a deliberately non-linear composition.

RESOLUTION PROTOCOL

Keep the source order intact. Record any proposed chronological order as a reversible editorial layer. Cite LA-042 when folio 184 is discussed.

BOUNDARY

No claim is made about a real date, correspondent, or archive.

Internal working citation: LA-042. This document contains fictional analysis only.
