

Folio 184 handwriting comparison

A synthetic feature note for editorial alignment

Observations

The brown iron-gall-style hand varies at the baseline near the paper ridge. A blue-pencil intervention appears only in the synthetic editorial layer.

Comparison matrix

Letter spacing, pause marks, and the clipped signature are compared by line number: 02, 03, 06, and 10. The comparison supports a provisional reading, not attribution.

Reading consequence

The linden phrase is indexed as a scene of multilingual listening. Cross-reference the source alignment record for P01 through P03.
