

# Synthetic Engineering Export Report — EXP-26Q3-004222

Generated 2026-08-23T09:34:00+09:00 · Aster Loop■■■■ · downloads/exports

## Evidence reconciliation

This searchable synthetic report is derived from same-scope export p01-full-000660. It records Product Alpha R7 with lifecycle state released and a 184 ms engineering anchor. The report is a transport representation and does not replace the base record.

| Field          | Value                     |
|----------------|---------------------------|
| Export ID      | EXP-26Q3-004222           |
| Source ID      | p01-src-004222            |
| Dependency     | p01-full-000660           |
| Generated      | 2026-08-23T09:34:00+09:00 |
| Status         | released                  |
| Latency anchor | 184 ms                    |

## Controlled terminology

Approval boundary, non-approved, and rollback drill retain their p01 content-spine meanings. All identities and measurements are synthetic and internally consistent.
