

MTG-ENG-20260914-74 - Meeting Evidence

Aster Loop■■■■■ | Product Engineering | synthetic record

Decision context

Reference: MIG-26Q3-W04

Base record: engineering-meeting-sql-src-005235.sql

The meeting records an evidence-based review of an engineering follow-up.

The release-gate and approval-boundary terminology is retained consistently.

No incident, customer record, or credential is represented in this synthetic artifact.
