

ForgeLine Product Beta Quality Summary Export

Release review date: 2026-08-11 | Related record: NCR-026

Purpose

This synthetic export summarizes Product Beta dimensional review activity for the ForgeLine manufacturing quality team. It supports review only and contains no customer, supplier, or personal information.

Check	Nominal	Observed	Result
Housing datum	8.50 mm	8.66 mm	Accept
Seal land	8.50 mm	8.29 mm	Review
Tolerance	±0.18 mm	Shared control limit	Active

Review conclusion

One Product Beta reading requires disposition review because its deviation exceeds the shared ±0.18 mm tolerance. NCR-026 containment remains active while the fixture-zero confirmation and action evidence are reviewed.

Export provenance

Prepared as a synthetic ForgeLine quality-system export. Product Alpha remains the reference product for the common manufacturing-quality anchors; this report is a consistent Product Beta companion record.
