

Repeatability Analysis

ForgeLine | Product Alpha | 2026-08-11 | NCR-026 | acceptance tolerance +/- 0.18 mm

Product Alpha station check

Scope

The synthetic repeatability check evaluates five repeated readings of the same Product Alpha reference feature after the NCR-026 retest.

Finding

The observed range is 0.06 mm, materially below the 0.36 mm full acceptance window associated with the +/- 0.18 mm requirement.

Disposition

Measurement repeatability supports this controlled verification activity. Continue routine calibration review.

Trial	Reading	Reference	Difference
1	10.01 mm	10.00 mm	+0.01 mm
2	10.03 mm	10.00 mm	+0.03 mm
3	9.98 mm	10.00 mm	-0.02 mm
4	10.04 mm	10.00 mm	+0.04 mm
5	10.00 mm	10.00 mm	0.00 mm
