

Verification Protocol Results

ForgeLine | Product Alpha | 2026-08-11 | NCR-026 | acceptance tolerance +/- 0.18 mm

Controlled closure evidence for NCR-026

Protocol intent

Verify that Product Alpha dimensions, fixture zero condition, and inspection environment meet the defined release criteria on 2026-08-11.

Results review

Each protocol step completed with an acceptable outcome. The observed values remain consistent with the dimensional test export and the NCR-026 retest summary.

Release recommendation

Quality engineering may record the retest evidence as acceptable for the synthetic Product Alpha batch. This document does not represent a real production release.

Step	Verification activity	Evidence	Outcome
1	Fixture zero confirmation	Zero check log	Pass
2	Dimensional series	Measurement series	Pass
3	Environment review	Station environment log	Pass
4	NCR-026 retest	Retest summary	Pass
