

Risk Reduction Report

NCR-026 | Product Beta dimensional control

CAPA	NCR-026
Product	Product Beta
Review date	2026-08-11
Acceptance limit	±0.18 mm

Risk statement

An unverified finish-pass offset could allow a locating-feature deviation to pass into release.

Control improvement

The workflow requires a metrology measurement and second-person verification before release.

Residual risk

Residual risk is acceptable when the recorded result is within ±0.18 mm and the evidence register is complete.
