

# Verification Report

NCR-026 | Product Beta corrective-action verification

|                  |              |
|------------------|--------------|
| CAPA             | NCR-026      |
| Product          | Product Beta |
| Review date      | 2026-08-11   |
| Acceptance limit | ±0.18 mm     |

## Verification scope

Three monitored Product Beta lots were reviewed after the controlled workflow update.

## Result

Each reviewed locating-feature measurement was within ±0.18 mm; setup and release were independently recorded.

## Conclusion

The corrective action is ready for the scheduled effectiveness decision, subject to completion of the ten-lot monitoring plan.
