

Supplier Audit Summary

Synthetic quality review issued 2026-08-11

Record anchor	Disposition	Verification
ForgeLine Product Alpha 2026-08-11 NCR-026 tolerance +/-0.18 mm	Synthetic training record	Internal quality review

Scope

ForgeLine reviewed the Product Alpha verification route using a synthetic audit scenario. The anchor record is NCR-026 and the documented acceptance tolerance is +/-0.18 mm.

Finding and containment

The review identified a documentation traceability gap between a measurement confirmation and its control-plan reference. The route is designated for follow-up; this report does not represent a real product, supplier, or release decision.

Follow-up

The assigned action is to connect the verification step, acceptance criterion, and evidence reference before the next scheduled internal review.
