

# Architecture evidence brief - p01-src-000178

## Aster Loop | Product Alpha R7 | Architecture evidence

Artifact ID: p01-full-000178  
Dependency record: p01-full-005369  
Review date: 2026-07-13

| Architecture control | Observed evidence                           |
|----------------------|---------------------------------------------|
| Decision             | ADR-042 keeps the asynchronous release gate |
| Approval boundary    | Release Coordinator to Decision Store       |
| Observed p95         | 184 ms                                      |
| SLO ceiling          | 200 ms                                      |
| Record status        | released                                    |

This searchable synthetic brief connects source p01-src-000178 to dependency p01-full-005369. Event Bus delivery occurs after the gate decision, and Observability confirmation closes the measured path. No real operational data is represented.
