

# Architecture evidence brief - p01-src-008636

## Aster Loop | Product Alpha R7 | Release-gate architecture

Artifact ID: p01-full-008636  
Dependency record: p01-full-007047  
Evidence date: 2026-07-13

| Control      | Evidence                                    |
|--------------|---------------------------------------------|
| Decision     | ADR-042 keeps the asynchronous release gate |
| Boundary     | Release Coordinator to Decision Store       |
| Observed p95 | 184 ms                                      |
| Target       | 200 ms                                      |
| Review state | reviewed                                    |

Synthetic engineering evidence for source p01-src-008636 uses dependency p01-full-007047. Event Bus delivery follows the gate decision and Observability confirmation closes the measured path.
