

Product Beta R4 Architecture Evidence

Architecture review note - 006805

Aster Loop | Product Beta R4 | Review date 2026-08-17 | Design p95 budget 225 ms

Review focus

This one-page synthetic evidence record documents replay-safe consumer flow. The architecture keeps a durable decision before asynchronous event distribution and preserves a clear evidence path for the review.

Traceability

Artifact ID:	p01-full-006805
Source ID:	p01-src-006805
Base evidence artifact:	p01-full-007020
Base evidence path:	documents/work/product-beta/architecture/beta-r4-architecture-sql-src-007020.sql
Review state:	reviewed

Architecture relationship

The referenced structured record is the typed source for this presentation. The 225 ms value is a design target, not an observed production result. The review confirms the event-driven boundary for synthetic staging work.
