

Incoming Engineering Evidence

INBOX-002281

Product Alpha R7 | source p01-src-002281 | status: unreviewed inbox

Context

Synthetic downloaded evidence for Product Alpha R7. The reported p95 is 185 ms; the accepted Alpha reference remains 184 ms and the target ceiling is 200 ms.

System relationship

The release-gate flow remains asynchronous: Release Coordinator reaches the approval boundary before Decision Store, then Event Bus and Observability confirmation follow.

Intake disposition

This searchable report is an unreviewed inbox derivative. It is for triage only and does not constitute an accepted engineering decision.
