

MIG-26Q3-W03 migration evidence note

p01-src-008222 | partner-bridge | synthetic operations record

Program	Aster Loop migration program
Schedule	Cutover 2026-09-14 Closeout 2026-09-18
Objectives	RPO 5m RTO 45m
Base evidence	operations/migration-notes/migration-wave-yaml-src-011882.yaml

Operational reading

Wave 3 advances partner-bridge with a snapshot, ordered replay, route switch, and restore rehearsal. The service set for this wave is identity-sync, catalog-index, billing-ledger. The evidence must show replay age within the recovery-point target before routing changes.

Acceptance sequence

1	Capture and reconcile the source snapshot.
2	Verify ordered replay and the recovery-point objective.
3	Confirm the cutover route has a single active writer.
4	Record restore rehearsal evidence and close on the scheduled review date.

Closeout statement

The 2026-09-18 review records the verified operational evidence for the 2026-09-14 cutover. This document uses only synthetic program facts and contains no private systems or customer records.
