

# Product Beta R4 Repository Evidence

**Evidence record:** p01-full-001335    **Canonical source:** p01-src-001335

This searchable repository report records a synthetic compatibility and release-readiness review for Aster Loop Product Engineering. It is aligned to the Product Beta R4 architecture review on 2026-08-17, schema freeze on 2026-09-04, and target release on 2026-09-28.

| Control               | Evidence                                                                   |
|-----------------------|----------------------------------------------------------------------------|
| Dependency input      | p01-full-002733 at repos/product-beta/docs/beta-r4-docs-sql-src-002733.sql |
| Design latency budget | 225 ms (design target, not an observed result)                             |
| Contract baseline     | 1,240 tests: 1,231 passing; 9 failing; 99.27% rounded                      |
| Release rule          | Persist gate decision before downstream event delivery                     |
| Review state          | Synthetic repository reference; no production data or credentials          |

Verification note: the referenced same-scope structured source supplies the typed facts for this presentation. This report preserves identifiers, dates, counts, units, and terminology without introducing a second project truth.
