

Access Review Policy

Entitlement recertification

OWNER	Security & GRC
EFFECTIVE	2026-07-13
REVIEW CYCLE	Annual or material change
CLASSIFICATION	Internal

1. Purpose and scope

This policy establishes how Cobalt Harbor Systems ensures that privileged and sensitive entitlements are reviewed by accountable managers at defined intervals. It applies to personnel and approved providers performing the governed activity.

2. Control objectives

Objective A. Establish accountable, repeatable operating decisions for entitlement recertification.

Objective B. Produce evidence that supports independent assurance and timely remediation.

3. Required operating practices

1. Plan the activity with documented scope, owner, and timing appropriate to entitlement recertification.
2. Execute and record the activity using the required evidence attributes: review population, reviewer decision, removal ticket, exception, and completion evidence.
3. Review exceptions and changes before they affect the control conclusion.
4. Preserve decisions and evidence in the approved repository for the stated retention period.

4. Accountability

ROLE	RESPONSIBILITY
Application owner	Carries the assigned decision, review, or recordkeeping responsibility.
Manager reviewer	Carries the assigned decision, review, or recordkeeping responsibility.
IAM operations	Carries the assigned decision, review, or recordkeeping responsibility.

Entitlement recertification: assurance criteria

5. Evidence standard

The accountable owner retains evidence that is sufficient to demonstrate the operating result. At minimum, each record includes: review population, reviewer decision, removal ticket, exception, and completion evidence. Evidence is linked to the applicable system, review period, owner, and disposition so another qualified reviewer can reproduce the conclusion.

6. Measurement and reporting

MEASURE	OPERATING THRESHOLD
Primary metric	Quarterly reviews complete at least 98% of in-scope accounts by deadline
Quality review	Evidence completeness and sampled accuracy are reviewed monthly.
Management reporting	Trends, overdue actions, and material exceptions are reported to Security & GRC.

7. Noncompliance and escalation

Unreviewed privileged access is suspended or escalated after five business days The responsible owner documents the correction, root cause, and follow-up verification. Material deviations are included in the assurance register until closure.

8. Revision and approval

The policy owner reviews this policy annually, after a material control change, or following an assurance finding related to entitlement recertification. Revisions must identify changed obligations, affected owners, and implementation timing before approval.
