

# API-A7-0294 API contract assurance

Aster Loop Product Engineering - synthetic searchable contract evidence

|               |                                          |
|---------------|------------------------------------------|
| Contract      | API-A7-0294                              |
| Artifact      | p01-full-000294                          |
| Source        | p01-src-000294                           |
| Dependency    | p01-full-003975                          |
| Release       | Product Alpha R7 (ALPHA-R7)              |
| Review date   | 2026-07-20                               |
| Target p95    | 200 ms                                   |
| Reference p95 | 184 ms accepted release-gate observation |

## Purpose

This one-page assurance note records the reviewed event delivery interface for Product Alpha R7. It is tied to p01-src-000294 and final artifact p01-full-000294. The supplied dependency p01-full-003975 is the scope-local engineering input used for reconciliation.

## Compatibility and release policy

The API follows additive-before-removal compatibility. ADR-042 retains the asynchronous release gate. The 200 ms p95 is a target; 184 ms is the accepted shared release-gate reference and is not an endpoint measurement.

## Review outcome

Contract API-A7-0294 is reviewed on 2026-07-20. This document uses only synthetic Aster Loop facts and contains no customer data, credentials, production addresses, or personal information.
