

# Evaluation Brief: Model Alpha M-14

Held-out metric card for Helix Forge Lab, 2026-07-13, run R184.

F1 0.873 | precision 0.881 | recall 0.865

## Scope

The held-out result summarizes five synthetic intent labels under the locked R184 evaluator. Macro averaging prevents the larger route category from masking a weak smaller label.

## Interpretation

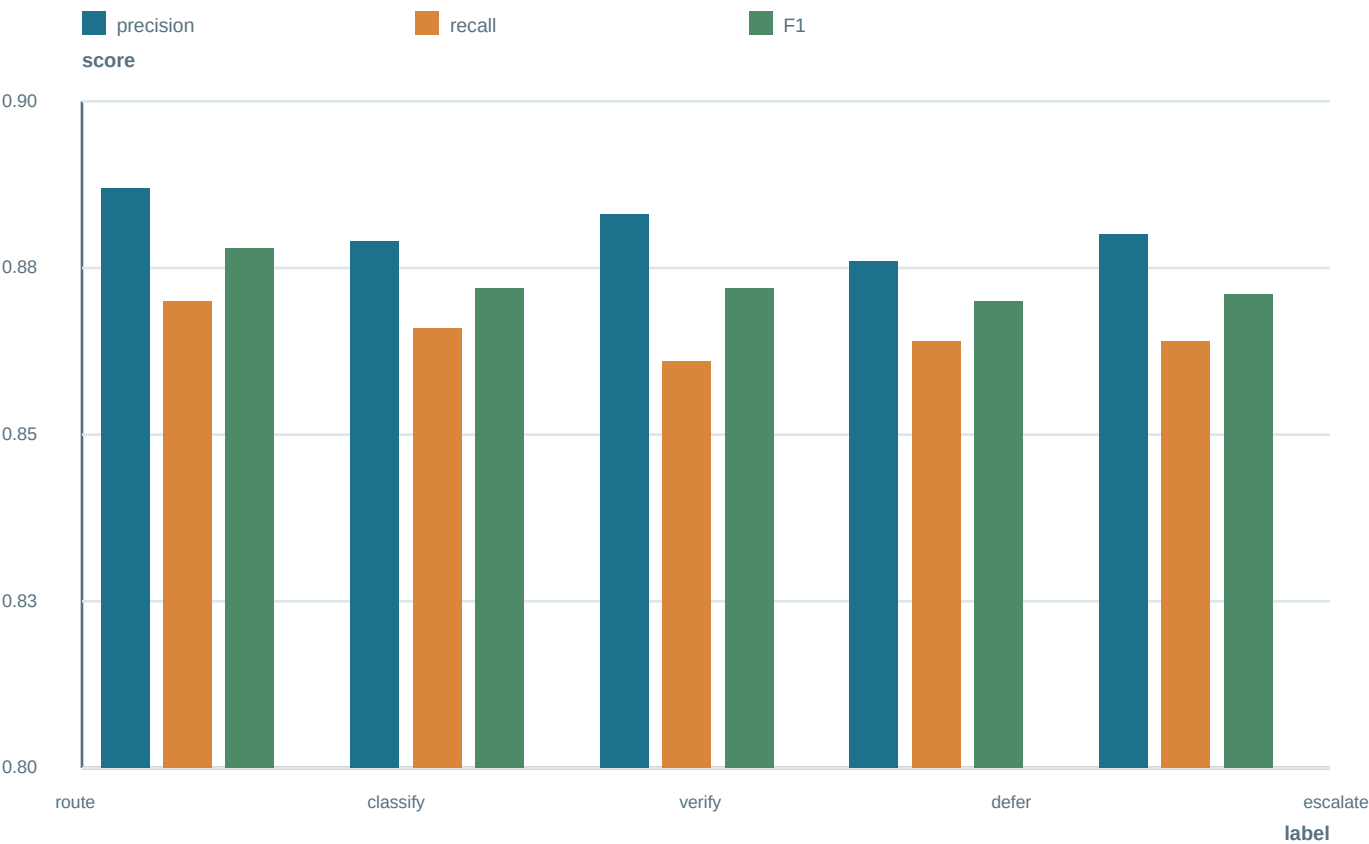

Alpha cleared the comparison gate with a close precision-recall balance; no one label supplies the aggregate result.

## Decision evidence

| intent   | precision | recall | F1   |
|----------|-----------|--------|------|
| route    | .887      | .870   | .878 |
| classify | .879      | .866   | .872 |
| verify   | .883      | .861   | .872 |
| defer    | .876      | .864   | .870 |
| escalate | .880      | .864   | .871 |

# Per-label score profile

Topic-specific analytical figure for the same synthetic R184 record.

**Interpretation:**

Per-label scores remain close to the aggregate; macro F1 0.873 is not carried by volume alone.
