

Evaluation Dataset Specification

HF-Eval-S1/S2 v3.2 synthetic corpus definition.

exactly 2,400 synthetic records | five labels

Scope

HF-Eval-S1/S2 v3.2 is fictional and synthetic-only: S1 has 1,600 records and S2 800, labeled route, classify, verify, defer, or escalate.

Interpretation

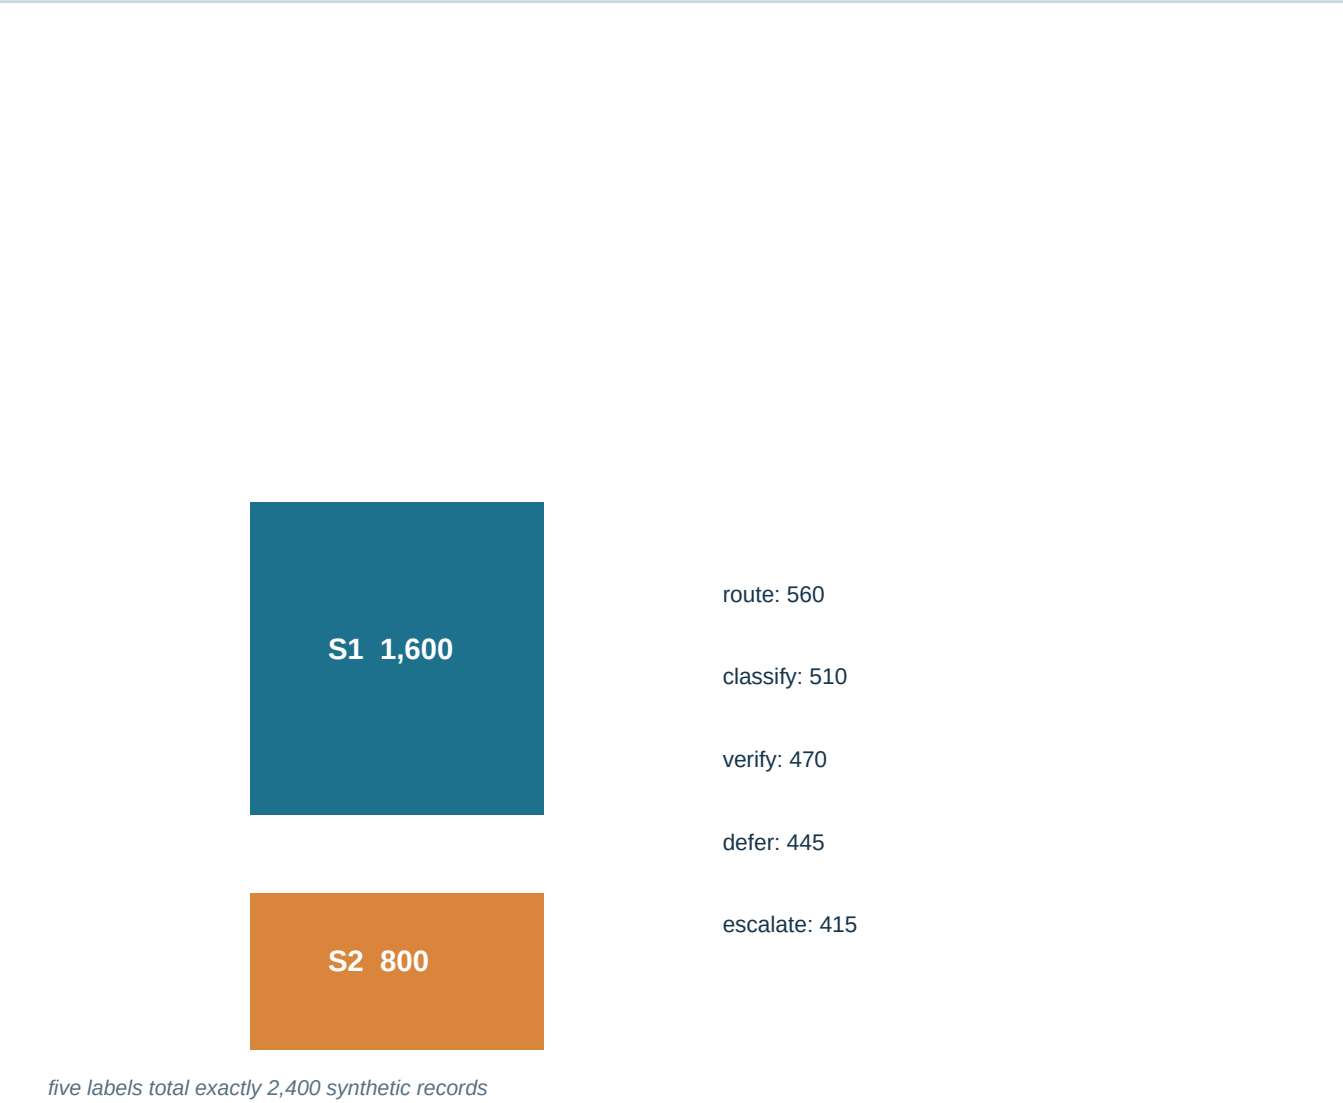

Uneven label counts are retained alongside macro metrics so prevalence remains auditable.

Decision evidence

field	definition	constraint
record_id	synthetic key	non-identifying
intent	five labels	required
partition	S1 or S2	1,600 / 800
evidence order	cue sequence	retained

Partition and label inventory

Topic-specific analytical figure for the same synthetic R184 record.

Interpretation:

Partition sizes and label counts reconcile exactly to 2,400 synthetic records.
