

Threshold Selection Report: R184

Decision threshold chosen from validation trade-offs.

selected 0.68 | macro F1 0.873 | review rate 12%

Scope

Candidate points are compared on macro F1, recall, and review burden. A middle threshold maximizes F1 while preserving a recall floor.

Interpretation

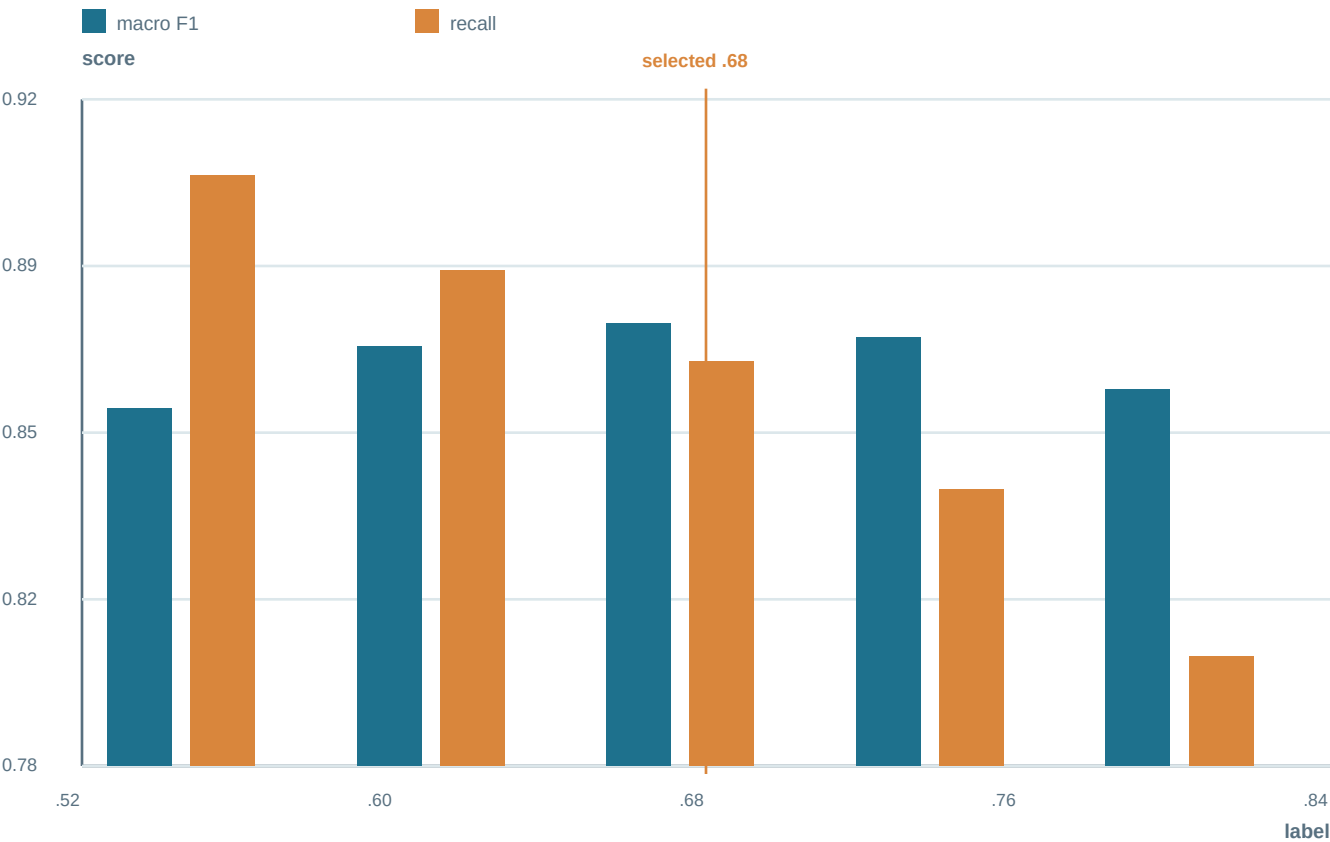

At 0.68 uncertain records route to review; higher thresholds lose recall faster than the policy accepts.

Decision evidence

threshold	macro F1	recall	review
.52	.855	.904	19%
.60	.868	.884	15%
.68	.873	.865	12%
.76	.870	.838	9%
.84	.859	.803	6%

Threshold trade-off

Topic-specific analytical figure for the same synthetic R184 record.

Interpretation:

The selected point preserves the review-rate trade-off in the table.
