

Alpha onboarding tickets

Guided setup and first-value friction

Tracked workspaces	486
Coded contacts	71
Contact rate	14.6%
Primary theme	Onboarding

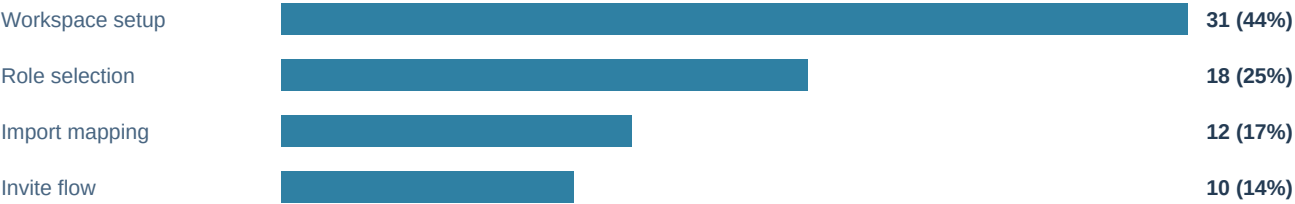

Decision signal

First-session setup accounts for the largest avoidable support burden in the alpha cohort.

Gate impact: M-27 guided rollout gate on 2026-09-18. Ship checklist copy and an inline import example; monitor completion at day 7.

Theme distribution

Share of coded contacts

Method: fully synthetic, aggregated support themes coded from simulated ticket summaries. Counts describe contacts, not unique people or accounts.

Analysis and operating recommendation

A support view for Product Alpha Q3

Severity and trend

Theme	Contacts	Share	Severity	Trend
Workspace setup	31	44%	High	Rising
Role selection	18	25%	Medium	Stable
Import mapping	12	17%	Low	Stable
Invite flow	10	14%	Low	Stable

Recommendation

Ship checklist copy and an inline import example; monitor completion at day 7.

Owner cue: Product and Support Operations should review the focus theme twice weekly until the M-27 decision. The 2026-09-18 gate should be treated as a rollout decision, not a promise of broad availability.

Limitations

This report uses intentionally synthetic aggregated tickets. It excludes customer names, organizations, contracts, authentication data, recordings, and free-form transcripts. Trends are directional planning signals and are not a production support forecast.
