

Enterprise admin friction

Permissions and governance analysis

Tracked workspaces	298
Coded contacts	58
Contact rate	19.5%
Primary theme	Permissions

Decision signal

Admin questions are lower-volume but carry the highest severity and block rollout decisions.

Gate impact: M-27 readiness review on 2026-09-18. Make role-preview mandatory in guided rollout and publish an admin handoff checklist.

Theme distribution

Share of coded contacts

Method: fully synthetic, aggregated support themes coded from simulated ticket summaries. Counts describe contacts, not unique people or accounts.

Analysis and operating recommendation

A support view for Product Alpha Q3

Severity and trend

Theme	Contacts	Share	Severity	Trend
Role preview	20	34%	High	Rising
SCIM mapping	16	28%	Medium	Stable
Audit export	13	22%	Low	Stable
Policy controls	9	16%	Low	Stable

Recommendation

Make role-preview mandatory in guided rollout and publish an admin handoff checklist.

Owner cue: Product and Support Operations should review the focus theme twice weekly until the M-27 decision. The 2026-09-18 gate should be treated as a rollout decision, not a promise of broad availability.

Limitations

This report uses intentionally synthetic aggregated tickets. It excludes customer names, organizations, contracts, authentication data, recordings, and free-form transcripts. Trends are directional planning signals and are not a production support forecast.
