

Release readiness support

Support-informed launch checklist

Tracked workspaces	411
Coded contacts	52
Contact rate	12.7%
Primary theme	Permissions

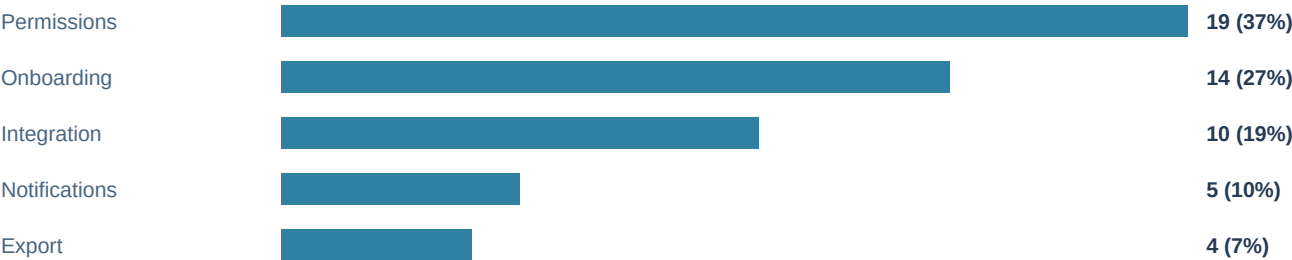

Decision signal

Readiness is conditional: high-severity admin blockers need an owner and repeatable support workaround.

Gate impact: M-27 release gate on 2026-09-18. Approve the limited guided rollout only with a published escalation path and daily triage through launch week.

Theme distribution

Share of coded contacts

Method: fully synthetic, aggregated support themes coded from simulated ticket summaries. Counts describe contacts, not unique people or accounts.

Analysis and operating recommendation

A support view for Product Alpha Q3

Severity and trend

Theme	Contacts	Share	Severity	Trend
Permissions	19	37%	High	Rising
Onboarding	14	27%	Medium	Stable
Integration	10	19%	Low	Stable
Notifications	5	10%	Low	Stable
Export	4	7%	Low	Stable

Recommendation

Approve the limited guided rollout only with a published escalation path and daily triage through launch week.

Owner cue: Product and Support Operations should review the focus theme twice weekly until the M-27 decision. The 2026-09-18 gate should be treated as a rollout decision, not a promise of broad availability.

Limitations

This report uses intentionally synthetic aggregated tickets. It excludes customer names, organizations, contracts, authentication data, recordings, and free-form transcripts. Trends are directional planning signals and are not a production support forecast.
