

Top contact drivers

Normalized contact-driver review

Tracked workspaces	672
Coded contacts	97
Contact rate	14.4%
Primary theme	Onboarding

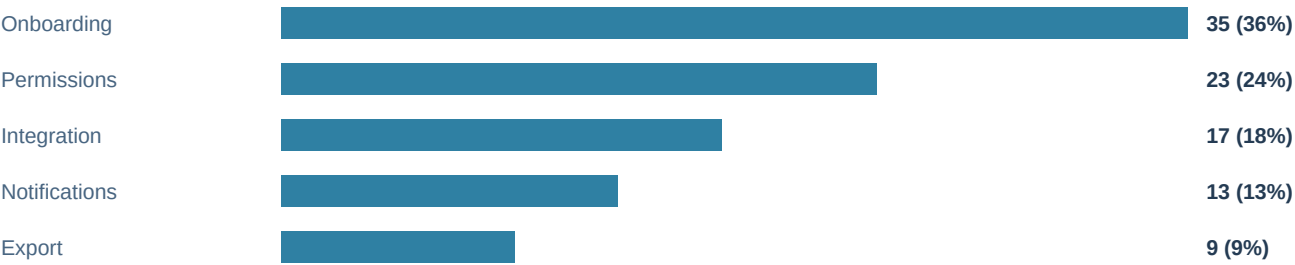

Decision signal

Onboarding and permissions explain 60% of tracked contacts and should define the next intervention sequence.

Gate impact: M-27 guided rollout gate on 2026-09-18. Prioritize onboarding copy, then admin role preview; defer lower-severity export polish.

Theme distribution

Share of coded contacts

Method: fully synthetic, aggregated support themes coded from simulated ticket summaries. Counts describe contacts, not unique people or accounts.

Analysis and operating recommendation

A support view for Product Alpha Q3

Severity and trend

Theme	Contacts	Share	Severity	Trend
Onboarding	35	36%	High	Rising
Permissions	23	24%	Medium	Stable
Integration	17	18%	Low	Stable
Notifications	13	13%	Low	Stable
Export	9	9%	Low	Stable

Recommendation

Prioritize onboarding copy, then admin role preview; defer lower-severity export polish.

Owner cue: Product and Support Operations should review the focus theme twice weekly until the M-27 decision. The 2026-09-18 gate should be treated as a rollout decision, not a promise of broad availability.

Limitations

This report uses intentionally synthetic aggregated tickets. It excludes customer names, organizations, contracts, authentication data, recordings, and free-form transcripts. Trends are directional planning signals and are not a production support forecast.
