

Analytics Taxonomy Reference

Purpose

This reference standardizes Product Alpha Q3 measurement. It is the shared vocabulary for M-27 planning.

Adoption baseline: 228 activated workspaces out of 1,240 eligible workspaces, or 18.4%. Q3 target: 26.0%.

Term	Rule
eligible_workspace	Provisioned and invited; exclude test and paused tenants
activated	Has governed_workflow_completed within 14 days
adoption	activated / eligible

Events

Events

Events are recorded once per workflow outcome. Event payloads must be synthetic and contain no customer identifiers.

Analytics publishes cohort refresh timing in the weekly metric note.

Event	Required properties
workspace_enabled	workspace_type, enabled_at
governed_workflow_started	workflow_type, policy_version
governed_workflow_completed	workflow_type, completed_at, outcome

Cohorts and checks

Cohorts and checks

The Q3 cohort uses workspaces enabled during the planning period. A denominator change requires a governance note.

Check	Owner
Duplicate event review	Analytics partner
Excluded tenant audit	Data steward
Metric contract review	Product manager
