| Review date | 2026-Q3                           |
| Artifact    | p02-full-013613                   |
| Incident    | INC-260713   2026-07-13           |

## Approved incident context

Northstar Transit Cloud | Checkout SVC-17 | incident INC-260713 | 2026-07-13

Checkout availability SLO: 99.95% over 30d; latency SLO: 99.0% below 400 ms. Remaining request-error allowance: error budget 2.4%.

Timeline: deployment 09:18 UTC; Q-07 warning 12,000 at 09:42; S2 09:47; rate limit 09:54; rollback approval 10:02; concurrency 10:11; Q-07 below 8,000/recovery 10:24; impact end 10:31; resolution 10:42 UTC; capacity headroom 31%.

Artifact p02-full-013613 / source p02-src-013613 / scope p02-secondary-02.

Tested reversal path: revert the deployment package, validate Checkout p95 below 400 ms and Identity p95 below 350 ms in harbor-test, then promote aurora-east before borealis-west. Scope-local evidence location: the scope-local documents/reference consumer-concurrency entry at 10:11 UTC. Accountable owner role: Observability on-call evidence custodian. Explicit stop condition: stop when request demand exceeds the observed 2,420 requests/s peak; resume only after the evidence chain is reconciled through 11:06 UTC and enhanced monitoring is armed for 24 hours.

Synthetic training record; no customer data, credentials, secrets, or Kio claims.

## Decision review: 2026 Q3 Reliability Reference Incident Schema Searchable Report Pdf Text

For 2026 Q3 Reliability Reference Incident Schema Searchable Report Pdf Text, evidence docket p02-src-013613 / p02-full-013613 uses p02-full-002827 to assess the Incident Schema operational component as a searchable evidence report, keeping its service context separate from the recorded Checkout cause, with a specific lens on critical-path chronology and action ownership. The review method is to test whether the metric table supports the stated action owner. The evidence is scoped to documents/reference, framed by term.rollback-ready, rel.slo.2026-q3, period.2026-q3, and evaluated to accept only timestamped operational evidence. The removed queue-pressure guardrail allowed demand to exceed consumer concurrency; retry amplification increased Q-07 and produced Checkout latency and failures. Identity was load-degraded only, never the initiating cause.

## Assigned actions

1. Checkout Operations: confirm that 2026 Q3 Reliability Reference Incident Schema Searchable Report Pdf Text cites the current p02-full-002827 hash before distribution.
2. Reliability Reference Maintainers: record the Incident Schema review outcome without changing the fixed incident causality; apply the critical-path chronology and action ownership lens and retain the row-specific scope documents/reference in the review record.
3. Platform Reliability: accept only timestamped operational evidence; test whether the metric table supports the stated action owner; preserve the causal chain from removed queue-pressure guardrail through demand exceeding consumer concurrency and retry amplification to Q-07 and Checkout latency and failures; record Identity as load-degraded only, never the initiating cause.

## Accepted foundation citation

Scope-local accepted foundation binding (consumed by this artifact):
