

Legacy Hold Release Summary

Closed matter record | Matter: Northwind Analytics Decommission | Closure date: 2025-11-21

Purpose and scope

This synthetic summary records the completed release review for a 2025 predecessor matter. The matter closed in 2025 after the approved preservation set was reconciled and no continuing legal hold condition was identified. It is not Matter Alpha, does not concern the 2026-06-30 Matter Alpha preservation set of 42, and creates no exception deadline on 2026-07-12.

Matter status	Closed - release approved for routine lifecycle processing
Preservation period	2025-08-04 through 2025-11-21
Record population	Synthetic policy drafts, vendor assessment notes, and closure correspondence
Disposition	Release from legacy hold; retain under Aster Legal retention practice
Retention class	PRIV-7 review at the scheduled retention checkpoint

Release decision

Records Operations confirmed that the predecessor matter was fully closed, the internal review question had been resolved, and the matter-specific hold could be released. Release does not authorize deletion outside the established retention schedule. The applicable records continue to follow Aster Legal's documented retention practice, including ordinary access controls and scheduled disposition review.

Boundary with current work

The current Matter Alpha workstream is separate and remains governed by its own 2026 instructions. No statement in this archive item changes the Matter Alpha anchor date, the 42-item preservation target, or the 2026-07-12 exception deadline.

Record note: This is a fully synthetic training artifact. It contains no actual legal advice, privileged content, personal data, customer data, credentials, or production matter information.
