

Retention Certificate

Closed matter record | Matter: Linden Retail Data Map Refresh | Certificate date: 2025-12-18

Certificate statement

Aster Legal Records Operations certifies that the synthetic 2025 predecessor matter identified below was closed and placed into the standard retention lifecycle. This certificate confirms retention classification and administrative closure only; it is not legal advice and does not document an active legal hold.

Matter reference	Linden Retail Data Map Refresh (synthetic predecessor matter)
Matter state	Closed on 2025-12-12
Classification	PRIV-7 - closed privacy matter records
Retain through	2032-12-31, subject to approved retention governance
Review trigger	Scheduled retention checkpoint or documented legal requirement
Records steward	Aster Legal Records Operations (synthetic function)

Continuity of practice

The classification preserves continuity with Aster Legal's retention practice: closed files remain controlled, are reviewed at the relevant retention checkpoint, and are not disposed of merely because a matter-specific hold ends. This archived 2025 certificate is separate from the active Matter Alpha program and its 2026 preservation instructions.

Matter Alpha separation

For clarity, this certificate neither covers nor modifies Matter Alpha. Matter Alpha is a distinct 2026 matter with a preservation target of 42 and an exception deadline of 2026-07-12. Those current constraints are not carried into this closed predecessor record.

Control note: Synthetic training record only. No real party, personal data, privileged document, access credential, or production retention decision is represented.
