

Security Schedule

Document status	EXECUTED - SYNTHETIC
Effective date	2026-06-30
Document version	Version 2.1
Matter reference	Matter Alpha / Service Operations
Preservation reference	42 items / exception date 2026-07-12

Parties. Aster Legal, a fictional enterprise legal operations group, and Cinder Bay Processing Ltd., a fictional service provider (each a “Party” and together the “Parties”).

This schedule states minimum security controls for the Alpha service environment, including access review, encryption, and incident coordination.

1. Access control

Administrative access requires named accounts, role-based authorization, and periodic review.

2. Protective measures

The provider will maintain encryption in transit, protected backups, and monitored boundary controls.

3. Assurance

At least annually, Cinder Bay will provide a synthetic control summary and remediate material findings on an agreed plan.

4. Incident coordination

Confirmed incidents are escalated through the designated privacy contact without undue delay.

5. Evidence

Control evidence is retained for the Matter Alpha review population of 42 synthetic items.

Execution and exhibits

The Parties acknowledge that this document is a complete synthetic training artifact. No real client matter, person, account, credential, or privileged record is included.

Exhibit A - Operational controls

Controls include role-based access, quarterly access review, encrypted transmission, documented deletion, and evidence retention sufficient to support the compliance review. The preservation population is fixed at 42 synthetic items; the stated exception review date is 2026-07-12.
