

Subprocessor Notification Protocol

Document status	EXECUTED - SYNTHETIC
Effective date	2026-06-30
Document version	Version 1.0
Matter reference	Matter Beta / Cinder Bay Processing Ltd.
Preservation reference	42 items / exception date 2026-07-12

Parties. Aster Legal, a fictional enterprise legal operations group, and Cinder Bay Processing Ltd., a fictional service provider (each a “Party” and together the “Parties”).

This protocol defines notice content, review timing, objection handling, and documentation for approved subprocessors.

1. Notice content

A notice identifies the proposed subprocessor, service function, location, and intended start date.

2. Review period

Aster Legal receives a reasonable review window before the proposed engagement becomes effective.

3. Objection

A documented, reasonable objection triggers good-faith mitigation discussion.

4. Flow-down

Cinder Bay remains responsible for written privacy and security obligations imposed on approved subprocessors.

5. Register

The provider maintains a current synthetic subprocessor register for the Beta review.

Execution and exhibits

The Parties acknowledge that this document is a complete synthetic training artifact. No real client matter, person, account, credential, or privileged record is included.

Exhibit A - Operational controls

Controls include role-based access, quarterly access review, encrypted transmission, documented deletion, and evidence retention sufficient to support the compliance review. The preservation population is fixed at 42 synthetic items; the stated exception review date is 2026-07-12.
