

Data minimization reference

Reference ID: AL-DM-042 **Status:** Synthetic training reference

Anchor: Aster Legal | Matter Alpha | 42 preservation targets | exception review 2026-07-12

A practical reference for limiting collection and sharing in the fictional Aster Legal framework.

Start with the decision

State the operational decision before selecting sources. Choose only fields needed to answer it.

Bound the review packet

Limit time range, recipients, and copies. De-identification does not automatically end a preservation obligation.

Document exclusions

Record exclusions and residual questions so later reviewers do not broaden the request by assumption.

Working checklist

Review step	Practical check
Fields	Have direct identifiers and derived attributes been separately assessed?
Audience	Are recipients limited to the stated purpose?
Retention	Does an active hold override normal deletion?

This document uses an invented framework and identifiers. It does not state real law or legal advice.
