

Legal hold process reference

Reference ID: AL-LH-042 **Status:** Synthetic training reference

Anchor: Aster Legal | Matter Alpha | 42 preservation targets | exception review 2026-07-12

A synthetic playbook for opening, communicating, monitoring, and releasing a preservation instruction.

Open

Define the hold matter, source categories, custodial roles, and escalation route. Assign a reference identifier and issue a clear preservation instruction.

Monitor

Track acknowledgement, source changes, exceptions, and follow-up. Matter Alpha contains 42 preservation targets; unclosed exceptions require a dated decision.

Release

Only an authorized release notice may end preservation. Preserve the decision record and avoid retroactive deletion instructions.

Working checklist

Review step	Practical check
Scope	Is each target tied to a source or custodian role?
Acknowledgement	Has the custodian confirmed receipt and escalation path?
Exception	Does each exception have an owner, safeguard, and due date?

This document uses an invented framework and identifiers. It does not state real law or legal advice.
