

Data source confirmation

Evidence source and handling record

Matter	AL-PB-2604
Processor	Cinder Bay Processing Ltd.
Prepared	24 June 2026
Classification	Synthetic internal review record

Purpose. Confirms the synthetic sources used to assess the processor controls.

Source register

Reviewed sources are policy narratives, sample control descriptions, and synthetic screenshots described in correspondence. No customer record, employee record, or production export is in scope.

The data-source register will be refreshed when B-04 regional mapping and B-07 retention labels are delivered.

Handling statement

Evidence descriptions are sufficient for this review. If a future demonstration is needed, it must use de-identified, synthetic test data.
