

Cross-Border Transfer Review Guidance

Guidance ID G-2026-04 | Version 1.0 | Internal working guidance | 2026-06-30

Use notice. This is an internally synthesized training document. Aurora Federation, Harbor State, Aster Legal, Matter Alpha, and every source cited here are fictional. It is not legal advice or a statement of current law.

Purpose

A repeatable review for proposed transfers of Matter Alpha data from an Aurora Federation business unit to a Harbor State service provider.

Scope and boundary

Transfer candidates include support telemetry, vendor diagnostics, and the 42 preservation-target records. The legal hold does not authorize a new destination or a broader use.

Rule summary

A transfer may proceed only when its data flow is mapped, its role and destinations are known, approved fictional safeguards address the identified risk, and the decision is recorded before access begins.

Decision path

Step	Required action
1	Map the flow Identify sender, recipient, systems, data categories, onward transfers, and hosting locations.
2	Classify the transfer Decide whether the activity is a restricted transfer, a processor access, or a documented internal access.
3	Select safeguards Use the approved addendum, supplemental controls, and transfer record; do not rely on a label alone.
4	Approve or escalate Privacy Legal approves standard low-risk transfers; unresolved government-access or sensitive-data risks go to the Privacy Review Council.

Operating controls

Escalation trigger

If a recipient cannot accept the approved addendum or proposes onward access, pause the transfer and escalate within one business day.

Recordkeeping

Keep the flow map, signed safeguard record, risk note, approval, and annual re-review date in the Transfer Register.

Roles and cadence

Business owner supplies complete facts and implements controls. Privacy Legal verifies the review path, decision rationale, and escalation. Records Management maintains retention evidence. Reassess on a material change, a new recipient or system, a control failure, or the scheduled annual review.

Fictional source register

Reference	Fictional use
Aurora Federation Privacy Framework, 2026 edition	Synthetic baseline for purpose limitation, accountability, and transfer review.
Harbor State Information Stewardship Rules, guidance note 4	Synthetic comparison point for notification, processor, and records controls.
Aster Legal Matter Alpha control register, 2026-06-30	Synthetic operational anchor for preservation target 42 and exception workflow.

Decision record minimum

Record the request or event, scope, facts relied upon, rule path, decision maker, conditions, escalation outcome, review date, and storage location. Do not include personal data, credentials, or privileged source material in this guidance record.
